

**Department of Computer Technology****Vision of the Department**

To be a preferred hub for nurturing computer engineering aspirants through innovative, ethical, value-based technical education, impactful research, and industry collaboration, to become successful professionals contributing for the betterment of society.

Mission of the Department

To nurture computer engineering professionals by offering: Dynamic learning environment that encourages problem-solving using emerging technology, - National Education Policy aligned evidence-based technical education, fostering innovation, research, and industry-institute collaboration, Holistic, ethical and sustainable development for lifelong success.

Session 2026-2027(ODD)

Vision: Dream of where you want.	Mission: Means to achieve Vision
---	---

Program Educational Objectives of the program (PEO): (broad statements that describe the professional and career accomplishments)

PEO1	Preparation	P: Preparation	Pep-CL abbreviation pronounce as Pep-si-IL easy to recall
PEO2	Core Competence	E: Environment (Learning Environment)	
PEO3	Breadth	P: Professionalism	
PEO4	Professionalism	C: Core Competence	
PEO5	Learning Environment	L: Breadth (Learning in diverse areas)	

Program Outcomes (PO): (statements that describe what a student should be able to do and know by the end of a program)

Keywords of POs:

Engineering knowledge, Problem analysis, Design/development of solutions, Conduct Investigations of Complex Problems, Engineering Tool Usage, The Engineer and The World, Ethics, Individual and Collaborative Team work, Communication, Project Management and Finance, Life-Long Learning

PSO Keywords: Cutting edge technologies, Research

“I am an engineer, and I know how to apply engineering knowledge to investigate, analyse and design solutions to complex problems using tools for entire world following all ethics in a collaborative way with proper management skills throughout my life.” to contribute to the development of cutting-edge technologies and Research.

Integrity: I will adhere to the Laboratory Code of Conduct and ethics in its entirety.

(Signature and Date in Handwritten)

**Department of Computer Technology****Vision of the Department**

To be a preferred hub for nurturing computer engineering aspirants through innovative, ethical, value-based technical education, impactful research, and industry collaboration, to become successful professionals contributing for the betterment of society.

Mission of the Department

To nurture computer engineering professionals by offering: Dynamic learning environment that encourages problem-solving using emerging technology, - National Education Policy aligned evidence-based technical education, fostering innovation, research, and industry-institute collaboration, Holistic, ethical and sustainable development for lifelong success.

Session	2026-27 (ODD)	Course Name	LAB: Software Engineering
Semester	7th	Course Code	23CT1704
Roll No	83	Name of Student	Trupal Tagade

Practical Number	2
Aim	To study and create Software Requirement Specification document for the given case study
Theory (100 words)	Software Requirement Specification (SRS) Format as name suggests, is complete specification and description of requirements of software that needs to be fulfilled for successful development of software system. These requirements can be functional as well as non-functional depending upon the type of requirement. The interaction between different customers and contractors is done because it's necessary to fully understand the needs of customers. Depending upon information gathered after interaction, SRS is developed which describes requirements of software that may include changes and modifications that is needed to be done to increase quality of product and to satisfy customer's demand.
Procedure and Execution (100 Words)	SRS Specification for Vehicle Booking System

Department of Computer Technology

Vision of the Department

To be a preferred hub for nurturing computer engineering aspirants through innovative, ethical, value-based technical education, impactful research, and industry collaboration, to become successful professionals contributing for the betterment of society.

Mission of the Department

To nurture computer engineering professionals by offering: Dynamic learning environment that encourages problem-solving using emerging technology, - National Education Policy aligned evidence-based technical education, fostering innovation, research, and industry-institute collaboration, Holistic, ethical and sustainable development for lifelong success.

Case Study

1) Introduction

i) Purpose of this Document

The purpose of this document is to define the requirements and functionality of the Vehicle Booking System.

ii) Scope of this Document

The system allows users to search vehicles, check availability, book vehicles, make payments, and manage bookings.

iii) Overview

The Vehicle Booking System provides an easy and efficient way to book vehicles online. It also helps administrators manage vehicles, users, and bookings.

2) General Description

The Vehicle Booking System is designed for users who want to book vehicles for a specific period. Users can view vehicle details, check availability, make bookings, and receive confirmation.

3) Functional Requirements

- User registration and login.
- Search and view available vehicles.
- Check vehicle availability.
- Enter booking details.
- Book a vehicle.
- Make payment.

Department of Computer Technology

Vision of the Department

To be a preferred hub for nurturing computer engineering aspirants through innovative, ethical, value-based technical education, impactful research, and industry collaboration, to become successful professionals contributing for the betterment of society.

Mission of the Department

To nurture computer engineering professionals by offering: Dynamic learning environment that encourages problem-solving using emerging technology, - National Education Policy aligned evidence-based technical education, fostering innovation, research, and industry-institute collaboration, Holistic, ethical and sustainable development for lifelong success.

- View and cancel bookings.
- Admin can add, update, and delete vehicles.
- Admin can manage user bookings.

4) Interface Requirements

The system should provide:

- Login and registration interface.
- Vehicle search interface.
- Vehicle details page.
- Booking form.
- Payment interface.
- Booking confirmation page.
- Admin dashboard.

5) Performance Requirements

- The system should respond quickly to user requests.
- Vehicle availability should be updated immediately after booking.
- The system should support multiple users at the same time.
- Booking and payment transactions should be processed efficiently.

6) Design Constraints

- The system requires an internet connection.
- User and booking data must be stored securely.
- Only available vehicles can be booked.
- A vehicle cannot be booked by two users for the same time period.
- The system depends on database and payment services.

Department of Computer Technology

Vision of the Department

To be a preferred hub for nurturing computer engineering aspirants through innovative, ethical, value-based technical education, impactful research, and industry collaboration, to become successful professionals contributing for the betterment of society.

Mission of the Department

To nurture computer engineering professionals by offering: Dynamic learning environment that encourages problem-solving using emerging technology, - National Education Policy aligned evidence-based technical education, fostering innovation, research, and industry-institute collaboration, Holistic, ethical and sustainable development for lifelong success.

7) Non-Functional Attributes

- Security: Protect user and payment information.
- Reliability: The system should work correctly without frequent failures.
- Usability: The interface should be simple and user-friendly.
- Maintainability: The system should be easy to update and maintain.
- Scalability: The system should support increasing users and vehicles.

8) Preliminary Schedule and Budget

Schedule:

- Requirement Analysis – 2 Days
- System Design – 3 Days
- Development – 7 Days
- Testing – 3 Days
- Deployment – 1 Day

Budget:

The budget includes development, database, hosting, testing, and maintenance costs.

9) Appendix

The appendix may contain additional information such as:

- UML diagrams
- Use Case Diagram
- Class Diagram
- Activity Diagram
- Database structure

Conclusion	A well-defined SRS for a Vehicle Booking System clearly describes the system requirements, functions, interfaces, data, and constraints. It helps developers understand the project and provides a clear roadmap for development, testing, and maintenance. A proper SRS ultimately improves system quality, reduces errors, and increases user satisfaction.
